FOREWORD

It is with sincere pleasure that I express my appreciation to the friends and customers who have helped in this gladiolus enterprise, which has grown from a small backyard planting in 1940 to about one and one-half acres this past year. True, this is not a large planting, but a small one and it is my intention to keep it that way so that rotation of land, careful attention to culture, harvesting, curing and general handling of bulbs will bring my customers the best bulbs possible. I grow all stock that is offered for sale from this list, which is made up after all bulbs are cleaned and I know exactly the bulbs I have to sell. When all of a variety or size of a bulb is sold out I am "fresh out" and have no more. Therefore get your order in early as each order is filled in the sequence received. In regard to substitutions—none will be made unless you give me permission on the order, preferably stating a second choice. Every order will include cultural directions. Policy on extra bulbs with retail cash order is generous and will depend on the size of the order. You will be satisfied.

Terms

Minimum Order \$3.00. Cash with all orders of \$10.00 or less. if your order is over \$10.00 I will accept 25% in cash and hold order for shipment in spring on receipt of the remainder. No C.O.D. orders please. Do not split a unit as quoted in price list, i.e., if item is listed at 2 for 25c do not order one for 13c. Ten bulbs may be had at eight times the price of one, and five at the ten rate. In other words, if a bulb is listed at 2 for 25c you may order ten bulbs for \$1.00 and five bulbs at 50c.

Acknowledgements and Shipments

As soon as your order is received it will be acknowledged with a copy. Please keep this as it will be your only receipt until you receive your order. Your order will be filled in sequence received and held for shipment until spring after danger of frost is over. All retail orders are sent prepaid parcel post; wholesale orders f.o.b. Schoharie, N. Y., via express. Please order early as I am not in a good position to accept orders after April 25th.

Bulb Sizes

Large size measure $1\frac{1}{4}$ inch and up; medium size $\frac{3}{4}$ inch to $1\frac{1}{4}$ inch; small size $\frac{1}{4}$ inch to $\frac{3}{4}$ inch. Bulblets are screened over a six-mesh screen.

Guarantee

My stock has been inspected by New York State Department of Farms and Markets and it is my policy to send out only good and healthy bulbs which are true to name. I can in no way be responsible for your crop. If on receipt of your bulbs you find them unsatisfactory in any way advise me at once and I will make full refund. If any should not be true to name after blooming, advise me and I will make a refund, replacement with normal increase or any other adjustment satisfactory to you.

1949 Introduction

BOSTON SHOW—Champion Spike and Champion R. I.

(See show reports for other prizes and awards)

BINGHAMTON SHOW—Champion Vase.

ONEIDA SHOW—Champion Basket.

N. A. G. C. Trial Gardens Approval Award 1950 (2-year test).

RHODE ISLAND TRIAL GARDENS—83 %.

CANADIAN TRIAL GARDENS—83 %.

PARTHIENA was trial garden tested and proved nationally before and after release in N.E.G.S., N.A.G.C., Rhode Island State and Canadian Trial Gardens.

PARTHIENA is a deep lavender or mauve and is in color class between 566 and 570, in fact it is the forerunner of a 568 class. It is especially fine for florist work and combines well with white, cream or yellow. It is lightly ruffled, average field height 50 inches, with flower-head 23 to 24 inches, florets up to seven inches, total buds 19-20, open florets 6-9, buds in color 5-8, days to bloom 90, disease resistant, highly recommended for standing up under heat, seldom crooks or flecks, recovers marvelously after travel, excellent cormel production and good germination, many cormels producing spikes. The stock raised this year from cormels, in spite of lack of rain or irrigation, contains a large percentage of number one and two bulbs. All spikes exhibited by me this summer were field grown without irrigation and very little rain.

PARTHIENA can win.

PARTHIENA can make profits.

- WHITE GOLD (506) Scheer '41 (70)**—A huge cream, early and opens up to five on a somewhat short flowerhead. I find that best results are obtained from No. 4 and No. 5 bulbs as the florets are not so large and spike is in better proportion.
L—3 for 25c. M—5 for 25c. S—10 for 25c. Bts—100 for 30c.
- WILMA DITTMAN (516) Maier '49**—A very tall pale buff with a faint pink veining in the throat. Opens 6-8 six-inch florets on a 30-inch flowerhead. Large bulb and 10 bulblets \$5.50.
- WINSTON (406) Palmer '41 (80)**—Bright cream which shades to lemon throat. If grown with moisture will attain good height and large florets. Florists ask for it.
L—2 for 25c. M—4 for 25c. S—10 for 25c. Bts—100 for 25c.
- ZELLADEE (466) Kaylor '46 (85)**—A lavender we have been trying since 1947. Opens 6-8 on tall spike of 20 buds, florets ruffled and 5 inches across. L—30c. M—20c. S—10c. Bts—10 for 25c.
